ABOUT SENTINEL42

An ISMS designed for founders, not procurement.

Sentinel42 is a live Information Security Management System aligned to ISO/IEC 27001:2022. It ships with a full policy set, Annex A control mapping, a risk register with owners, a hash-chained audit log, incident and DSAR logs, and role separation between Head of InfoSec, Head of Department and Auditor.

Why teams choose us

- Certification-ready on day one — Stage 1 evidence pre-scaffolded.
- Framework reuse — controls mapped once, counted for SOC 2, ISO 42001 and ISO 9001.
- UK / EU hosting — GDPR-aligned data residency by default.
- No per-control fees — flat annual pricing, no success invoices.

What's included in the core ISMS

Policy library · Statement of Applicability · Risk register · Supplier register · Assets & classification · Incident & DSAR log · Hash-chained audit trail · Management review pack · Auditor read-only access.

PRICING

Priced for founders, not procurement.

Annual list prices, ex VAT. No per-control fees, no setup charges.
